Conference on the prospects of growing medicinal plants

On October 7-8, 2019, the Republican Scientific and Practical Conference "Problems and Prospects for the Cultivation and Use of Medicinal Plants" was held at the Khorezm Academy of Mamun.

The conference was attended by scientists from a number of research institutions and higher educational institutions. The conference examined the prospects for the development of the pharmaceutical industry, the widespread introduction of medicinal plants in medicine in the Republic of Uzbekistan. Presentations were made on agricultural technology and biology of cultivated and introduced plants in the Republic. The work on the study of the chemical composition of medicinal plants and the isolation of biologically active compounds from them are presented.
