# Young Uzbek mathematician won a scholarship of the Sao Paulo Foundation

Leading Researcher of the Institute of Mathematics named after V.I. Romanovsky Abror Khudoiberdiev was awarded a scholarship from the International São Paulo Foundation in 2019 for his research in algebra and its applications.

Abror Khudoiberdiev is a laureate of a scholarship announced by the International Center for Theoretical Physics (ICTP) and the International Abel Scholarship Program of the International Mathematical Society. In 2014, he was elected as a member of the youth section of the World Academy of Sciences (TWAS). In 2017, A.Khudoyberdiev was awarded the prize for "The best scientific research" of the mathematical society of the Turkic world for scientific articles published in prestigious foreign scientific journals.

These days, the young scientist continues his research on the classification of small-dimensional Novikov algebras, studying conservative algebras and classifying conservative single-generator algebras as part of the 2019 São Paulo International Scholarship in collaboration with Professor Ivan Kaigorodov of ABC Federal University in São Paulo (Brazil).
